

Independent Contractor — Structural Installer Ad

United Steel Fabrication LLC is seeking an experienced Independent Contractor — Structural Installer to support structural steel installation and related field work on a project-by-project basis.

Company: United Steel Fabrication LLC

Location: Project-based / field work

Engagement Type: Independent Contractor

Schedule: Varies by project needs

Opportunity Summary

United Steel Fabrication LLC is looking for a qualified structural installer who can work independently, safely, and professionally on structural steel installation projects. This contractor role is intended for an experienced installer with the tools, knowledge, and ability to complete assigned work according to drawings, project requirements, and safety expectations.

The ideal contractor has hands-on experience installing structural steel, understands field conditions, communicates clearly, and takes pride in safe, accurate, high-quality work.

Scope of Work

- Install structural steel components according to drawings, specifications, and project requirements.
- Assist with setting beams, columns, embeds, bracing, stairs, platforms, handrail, and miscellaneous steel as assigned.

- Read and interpret erection drawings, shop drawings, field measurements, and layout information.
- Verify materials, piece marks, dimensions, and connection details before installation.
- Bolt, align, plumb, level, fit, and secure steel members as required.
- Coordinate with project managers, site supervisors, crane operators, and other trades as needed.
- Identify field conflicts, missing information, safety concerns, or installation issues and report them promptly.
- Maintain a clean, organized, and safe work area.
- Follow all applicable jobsite safety rules, OSHA requirements, and United Steel Fabrication LLC safety expectations.
- Provide reliable workmanship and complete assigned work within agreed project timelines.

Contractor Requirements

- Proven experience in structural steel installation, erection, or related field work.
- Ability to read and understand structural steel drawings and installation details.
- Knowledge of bolted connections, field fitting, alignment, layout, and safe erection practices.
- Must provide own basic tools and equipment required for the work unless otherwise agreed in writing.
- Must be able to work independently and manage assigned tasks without direct employee supervision.
- Must have reliable transportation to project locations.
- Must carry required insurance, licenses, or documentation as applicable to the work and project requirements.

- Must comply with all site-specific safety requirements and PPE rules.
- Welding experience is a plus but not required unless specified for a project.

Preferred Qualifications

- Experience with structural steel, miscellaneous metals, stairs, platforms, handrail, embeds, and field modifications.
- OSHA 10 or OSHA 30 certification preferred.
- Rigging, signaling, lift planning, forklift, or aerial lift experience preferred.
- Ability to coordinate effectively with general contractors, supervisors, and other trades.
- Strong attention to detail and commitment to quality workmanship.

Physical Requirements

- Ability to perform physical construction work in outdoor and jobsite conditions.
- Ability to lift, carry, climb, bend, kneel, reach, and work from heights as required.
- Ability to work around cranes, lifts, tools, equipment, vehicles, and active construction areas.
- Ability to wear required PPE, including hard hat, safety glasses, gloves, high-visibility clothing, fall protection, and appropriate work boots.

Independent Contractor Status

This is an independent contractor opportunity and is not an employee position. The contractor is responsible for their own taxes, insurance, tools, transportation, and business expenses unless otherwise agreed in writing. Work will be assigned based on project needs, contractor availability, qualifications, and business requirements.

Compensation

Compensation will be discussed based on experience, scope of work, project requirements, and agreed contract terms.

Equal Opportunity Statement

United Steel Fabrication LLC works with qualified contractors based on experience, capability, safety performance, reliability, and business needs.
